

# A Vision for West Virginia

*Families empowered to have an impact on our culture, shape public policy, and preserve a better future for their children!*

## Our values support our freedoms and our future!

### Life

Life is God-given and should be protected, nurtured, and respected.

### Marriage

Traditional marriage is foundational to family freedoms.

### Parental Authority

Parents are responsible for the training, nurturing, and educating of their children.

### Constitutional Government

Civil government's purpose is to maintain and support family freedoms, and not to take them away.

### Religious Liberty

Churches must be free to support families and their religious values.

## Our goal . . .

**To enable families to shape public policy through research, education, and advocacy.**

### Research

Solid research provides a deeper understanding of the issues and a sure foundation for ideas.

### Education

Families and legislators are empowered to act when provided with the facts.

### Advocacy

Families must be effectively represented by lobbyists and empowered to represent themselves.

### *We are committed to...*

Professional communications  
Effective management of all activities  
High standards of accountability  
Sound financial management and solid fundraising efforts

## The West Virginia Family Foundation

Empowering the family...  
preserving our future!
